

## Statement

**OwentekCo;ltd** declares that the product **120\*2.2CM natural wooden handles** supplied to VIRUTEX ILKO comes from forests that are being managed in a way that preserves biological diversity and benefits the lives of local people and workers, while ensuring it sustains economic viability. Some of the initiatives we implement to ensure the sustainability of our forests include as follows:

I Based on the Scientific ecological environmental management of eucalyptus plantations to achieve the coordinated development of economic benefits and ecological environment.

II On the issue of forest management, using the native species for regeneration.

III We strictly controlled the use of chemicals for eucalyptus trees cultivate.

IV The trees were scientifically rotated in stages to be a circular management model when harvested and utilized process.

V Improving the wellbeing of workers through higher wages and trainings to benefit the lives of local people and workers.

VI Engagement with local communities through local hiring to fuel local economic growth.

The statement is true and correct.
